GRADE at EVOKE Demoparty

Discussion Panel on Inclusion in Creative Computing

17:00-19:00 | 16th August 2024 | Cologne, Germany

This 2-hour discussion panel on the history of inclusion of women and minorities in the demoscene and creative computing, will take place during one of the biggest and most important grassroots events of its kind in Europe, Evoke 2024 demoparty.

Since 1997, around 350-400 members of the demoscene from across the continent come annually to Germany, to celebrate digital art and electronic music.

The demoscene is at the core of what GRADE defines as creative computing and Action's participation in the event will boost its visibility with key stakeholders. The panel will include two diversity advocates from the grassroots community and two representatives of GRADE, as well as an extensive Q&A and a brainstorming session.

If you are a diversity advocate active in the GRADE network, you can join this otherwise hybrid event in person! Contact me directly, at maria.garda@utu.fi.
